

Oracle Cloud Platform Application Development 2018 Associate

Oracle 1Z0-926 Dumps Available Here at:

<https://www.certification-questions.com/oracle-exam/1z0-926-dumps.html>

Enrolling now you will get access to 56 questions in a unique set of 1Z0-926 dumps

Question 1

What three mandatory components do you need to create in an Oracle Visual Builder Cloud Service (VBCS)

application to enable a web page that will show data from an external system? (Choose three.)

Options:

- A. Page Variables
- B. Business Object
- C. Process
- D. REST service
- E. Web application flow and page

Answer: B, D, E

Question 2

When creating Java Cloud Service (JCS) on Oracle Cloud Infrastructure (OCI), which of the following steps is

NOT a pre-requisite?

Options:

- A. You must have an Object Service Bucket for JCS backup.
- B. Database Cloud Service (DBCS) instances should be exactly in the same AD and same subnet as the JCS

instance.

- C. A Virtual Cloud Network is required.
- D. IAM policies are required to allow PSM to access VCN.

Answer: B

Question 3

Which authentication mechanisms can be used to secure your service in Oracle Application Container Cloud Service using Oracle Identity Cloud Service?

Options:

- A. OAuth
- B. Form based
- C. Digest
- D. Basic and OAuth

Answer: A

Question 4

Which statement is true for metrics using the REST API?

Options:

- A. You can collect memory and CPU usage.
- B. You can determine the number of failed requests.
- C. You can collect absolute and percentage memory usage.
- D. You can determine the number of requests per second.

Answer: D

Question 5

What do you need to run Visual Builder Cloud Service (VBCS)?

Options:

- A. All you need is download and install the Java client side program from OTN on your desktop.
- B. It needs Java Cloud Service as a prerequisite.
- C. It needs JDeveloper installed on your system to write applications.

D. It runs right in your browser.

Answer: B

Question 6

What is used for cluster management and for providing the API used for configuring and managing resources in a cluster created using Oracle Cloud Infrastructure Container Engine for Kubernetes (OKE)?

Options:

- A. The master node is responsible for cluster management and for providing the API.
- B. The Cluster State Store is responsible for cluster management and for providing the API.
- C. The Kube Proxy Service can do cluster and API management of cluster resources.
- D. Pods have the cluster agent software that can be used for cluster management and API management.

Answer: C

Explanation:

Reference: <https://www.oracle.com/webfolder/technetwork/tutorials/obe/oci/oke-full/index.html>

Question 7

In Oracle Application Container Cloud Service, what can you use to configure applications to be clustered so that they can communicate privately over internal network?

Options:

- A. cluster-config.json
- B. UI/application console
- C. deployment.json
- D. manifest.json

Answer: D

Explanation:

Explanation: Clustered Applications

Question 8

What are the four Oracle Java Cloud Service (JCS) REST API methods? (Choose four.)

Options:

- A. WRITE
- B. PUSH
- C. GET
- D. POST
- E. REPLACE
- F. PUT
- G. DELETE

Answer: B, C, D, G

Question 9

Which feature is NOT included in Oracle Developer Cloud Service?

Options:

- A. Git-based version management
- B. Issue tracking system
- C. Continuous integration engine
- D. Java EE server
- E. Code review system

Answer: D

Question 10

One of the key benefits of Oracle Java Cloud Service is "self-service".

Which two operations can you perform for a Java Cloud Service instance in Oracle Cloud Infrastructure Classic? (Choose two.)

Options:

- A. Add a WebLogic Server cluster.
- B. Uninstall the load balancer, if enabled.
- C. Change the WebLogic Server edition and version of the instance.

D. Change the shape of a node.

E. Decrease block storage.

Answer: A, B
