Question 4
You have an on-premises network that contains several servers. You plan to migrate all the servers to Azure. You need to recommend a solution to ensure that some of the servers are available if a single Azure data center goes offline for an extended period. What should you include in the recommendation?

Options:
A. fault tolerance  
B. elasticity  
C. scalability  
D. low latency  

Answer: A

Question 5
This question requires that you evaluate the underlined text to determine if it is correct. An organization that hosts its infrastructure in a private cloud can decommission its data center. Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

Options:
A. No change is needed.  
B. in a hybrid cloud  
C. in the public cloud  
D. on a Hyper-V host  

Answer: C

Question 6
https://www.certification-questions.com
What are two characteristics of the public cloud? Each correct answer presents a complete solution. 
NOTE: Each correct selection is worth one point.

Options:
A. dedicated hardware
B. unsecured connections
C. limited storage
D. metered pricing
E. self-service management

Answer: D, E

Question 7
This question requires that you evaluate the underlined text to determine if it is correct. 
When planning to migrate a public website to Azure, you must plan to pay monthly usage costs. 
Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

Options:
A. No change is needed
B. Deploy a VPN
C. pay to transfer all the website data to Azure
D. reduce the number of connections to the website

Answer: A

Question 8
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. 
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. 
An Azure administrator plans to run a PowerShell script that creates Azure resources. 
You need to recommend which computer configuration to use to run the script. 
Solution: Run the script from a computer that runs Linux and has the Azure CLI tools installed. 
Does this meet the goal?

Options:
A. Yes
B. No
Answer: B

Question 9
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

An Azure administrator plans to run a PowerShell script that creates Azure resources. You need to recommend which computer configuration to use to run the script.
Solution: Run the script from a computer that runs Chrome OS and uses Azure Cloud Shell.
Does this meet the goal?

Options:
A. Yes
B. No
Answer: B

Question 10
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

An Azure administrator plans to run a PowerShell script that creates Azure resources. You need to recommend which computer configuration to use to run the script.
Solution: Run the script from a computer that runs macOS and has PowerShell Core 6.0 installed.
Does this meet the goal?

Options:
A. Yes
B. No
Answer: A
